Dear Friend,

I'm sure you wouldn't argue that trying to find out what really makes money on the Internet can be an absolute nightmare. There's just so many people making wild and crazy claims about how you can make millions of pounds within a few short months working nothing more than an hour a day.

Phew!!!... Give us a break!

Most of these "pie-in-sky" and "pigs-might-fly" statements and promises come from the so-called Internet gurus residing just over the other side of the

"pond". And it's true that quite a few of these American marketers are very skilled at creating a "buzz" on the internet but don't be fooled into believing all the hype.

I expect you've come across some of these websites already and no one would blame you for being just a little bit sceptical. But, the real truth is... some people **are** quietly making small fortunes on the Internet. And the big question is... **how do they do it?**

Well, within the next few minutes you're about to find out the truth!

But before I reveal all the ins and outs, nuts and bolts and secret marketing strategies, which can make you seriously rich, take a moment to imagine how very different your life would be if you did have millions in the bank.

Most successful people have already done this mental exercise. It's called **visualisation**. Basically, what it means is... if you really want something and you're prepared to imagine that you already have it, then actually getting it will be the easy part.

Understandably a lot of people have a problem accepting this concept. How can simply imagining that you already have something that you really want, make it easier to acquire it? I know it can be difficult to accept, but as it won't hurt you one little bit... and as it won't cost you one single penny, why not just give it a try anyway?

Right, let's go...

Imagine what you could do with £30,000 a month!

- First off... imagine what it would be like to have **no debts whatsoever**. No credit cards and no loans. Wouldn't that make you feel like a big weight has been lifted off your shoulders? Next...

- Imagine yourself driving the **car of your choice**. A brand, spanking new top of the range car. Smell the fresh new upholstery and see it parked in your drive or outside your house.

- Imagine yourself in the **house of your choice**. It could be in the country, by the sea or right in the middle of the city. You don't have a mortgage and all the furnishings and fittings are brand new.

- Imagine yourself being on holiday. With £30,000 a month, life will seem like **one big holiday**. But just for a moment... see yourself enjoying a world cruise or sitting by the pool of a classy hotel somewhere in the Mediterranean. Feel the warm wind on your face.
- Imagine not having a boss and never having to commute through endless traffic jams twice a day. See yourself in **your home office** with all the latest computer technology at your fingertips.
- Imagine being able to spend more **time with your family**, or spend more time **enjoying your favourite hobby**. Or you could even take up a new hobby, learn some languages, learn to play an instrument, learn to fly a plane...

The point is... you could do just about anything you wanted to do. That's what money does... it buys you the freedom to choose how you want to live your life.

Never Has There Been A Better Time To Start A Business That Is Virtually Guaranteed To Bring You All The Riches You Deserve

So if money buys freedom how can you get more of it?

Well, if you're lucky you might inherit some. If you're extremely lucky you might win some on the lottery. If you're absolutely desperate you could steal some, but obviously that's very risky... so what's the alternative?

Ask your boss for a pay rise? No chance! That's just silly and you'll never become rich working for a boss. Your boss is more likely to become rich thanks to your efforts, but never the other way around.

Nope! There's only one sure way to becoming rich and that's to set up a business. When you have a business you can pay yourself whatever you like, providing your business is making enough money.

Now don't be put off by the thought of running a business. There's really nothing to it. All you have to do is keep a record of all your expenses and all your purchases. Having your own business also has many advantages over being employed, not least you will **pay less tax**.

That's right! If you start up a home based business, you can claim allowances for using a room in your home as an office, and you can claim allowances for heating, lighting, use of the telephone, use of your computer, purchases of software and books and... you'll pay less National Insurance contributions too.

Well the list goes on and on...

But the best part about running a home based business is you can start in your spare time, so you don't have to give up your regular day job right away. And you won't need to directly employ any staff either, so your overheads will be virtually non-existent.

Now, there's only truly one way to get a business up and running within a few hours, instead of the many months of planning, which are generally needed for starting a traditional type of business and that's... set up an **Internet business**.

Only the Internet makes it possible for absolutely anyone to go into business for themselves and to sell products or services to a whole worldwide market.

Now, you might be thinking... but doesn't an Internet business mean building websites and all that technical stuff? Yes it does... but you don't have to worry about any of that...

**You don't need to know how to build
websites... and you don't need any previous
experience**

Now, before you start thinking that you don't know anything about business, the Internet, websites and selling products online, you should know that not very long ago... neither did anyone else. In fact, some people still know very little about all the Internet techie stuff, but it hasn't stopped them from making an **absolute fortune** online.

You see, the Internet is still in it's infancy and everyone is still learning about all the various ways to make money from it. E-commerce type websites have only been around for about 10 years and it has only been in the last 6 or 7 years that people have begun to make serious amounts of money.

The people who are now making a good living on the Internet are the pioneers who were willing to take all the risks and step into the great unknown. And

many have now seen all their efforts come to fruition. They are also the people who made all the mistakes during their learning process, which is good news for you.

Why is that good news? Because they have obviously learned by their mistakes and they have passed on their success stories to others, which means anyone can now start up an Internet business, virtually risk free.

That's right! There's absolutely no need for you to make any big mistakes setting up a profitable online business. All the pitfalls have been clearly identified by others. And there's no need for you to risk your money either... and there's no need for you to study any business or marketing programmes. And what's more...

You don't need to know how to build websites... and you don't need to know anything about all the techie or geeky stuff. And it certainly doesn't matter what age you are, what gender you are and what qualifications or experience you have.

There's really no excuse!

Because everything that you need to do, to become incredibly rich from your own Internet business has already been thoroughly tried and tested. All you have to do is simply copy someone else's successful business plan. It really is that simple, but...

The problem most people face is... **believing that it could really be that simple**, and that's why they don't take action to make it happen. Can you believe that? What is it about people that just stops them dead in their tracks? What is it that holds them back even though they desperately desire to be rich?

I sincerely hope that you're not one of these people, but if you do have some nagging doubt about whether making vast amounts of money online could become a reality for you, then consider this...

- Thousands of people in the UK alone are currently making more than **£100,000 a year** from their Internet businesses. **And some have made millions.**

- The most profitable product that is currently being sold on the Internet is... **information.**

And remember this...

- With an Internet business, **the WORLD is your marketplace.**
- Every year, **billions of pounds** are spent on goods and services, which have been purchased on the Internet... and the market keeps getting bigger and bigger and bigger!

If you can manage to suspend your disbelief and scepticism, be prepared to "have a go", and get really excited about the prospect of making hundreds of thousands of pounds... then you really could be on your way to changing your life forever.

Look, here's a simple example of how vast amounts of money can be made on the Internet from a simple product...

Let's say you write, or get someone else to write, an information guide about...

"How to Train Your Dog in 7 Easy Steps". It's estimated that there are over 6 million dogs in the UK, so let's assume that there are just 2 million owners.

You set up a website, or have someone do it for you, to sell your guide and then you advertise it. In one month you get 10,000 visitors to your website and just 5% of them buy a copy of your guide, which you sell for £19.95.

That's $500 \times £19.95 = £9,997$

Multiply this by 12 months and that would give you an annual income of £119,700.

Or, another way to look at the potential income is 5% of 2 million multiplied by £19.95... That's a whopping £1,995,000.

That's almost £2 million pounds in sales from the UK alone. Imagine if you then started advertising to a US market. Now imagine if you had 10 different information products!

That's how easy it is to become very rich in a very short time on the Internet.

Now all you need to know is how to get started, what to sell and how your new business will operate.

And believe me... this is going to shock you! The following information is not for the faint-hearted...

How to generate over £600,000 in your first year from your own information websites

I'm going to briefly explain how one incredible lady, a single mum, turned her annual income into her hourly income. She has been able to do this by having a number of websites created, which sell nothing more than **information products**... just like the guide I mentioned earlier.

In her first year in business she made more than £600,000. But Now...

**Just one of her websites alone turns over more than £150,000 a month!
That's an incredible £1,800,000 a year!**

She didn't build her own websites, she just got someone to do this part for her. In fact you can get someone to do just about anything for you online, including writing your ads and sales letters, creating software and of course... creating profitable information products.

She'll tell you more about this...

Her name is Sandy Forster, and before she got into Internet marketing she was deeply in debt to the tune of £50,000, and as you might imagine, she was desperately unhappy. Now, the most amazing thing about this lady is how she simply changed her way of thinking, and it changed her life.

That's right! She just changed her mind-set. And that's what you will need to do if you want to become rich. You need to forget about the traditional ways of making money, and don't ever again even mention the word "job". You know you'll never get rich working for someone else.

So, to be successful you need to...

✓ **Forget about having to "work" for a living**

✓ **Forget about having a "boss"**

✓ **Forget about earning a "wage"**

✓ **Forget about your current financial situation and BELIEVE that there is a much better way of making money**

You must know that there's a better way, an easier way... don't you?

Well there is. And this is it... but will you have the courage to grasp this opportunity, which is about to be revealed and take the action necessary to make things happen? Sandy Forster did, and now she makes hundreds of thousands of pounds every month...

How?

Well, Sandy decided that she would look at what other people were doing on the Internet, then she simply copied their ideas. Only difference was... she was able to find her own little niche in a massive worldwide marketplace. But remember, her products are just basic information products, so they cost very little to create but they return **massive profits**.

Sandy managed to generate **over £600,000 in just one year** from her information websites, and now she's going to tell you exactly how she did it and how you can do the same.

Discover the unique marketing technique that will compel people to buy your products

If you're ready to change your life and get all the things you've ever wanted, then Sandy is ready and willing to help you.

Sandy will explain how she got started in her Internet business empire and how she creates the products that cost virtually nothing to produce yet bring in **thousands and thousands of pounds** every single month.

And there's more...

Not only does Sandy make tons of money each and every month, she makes most of it on complete autopilot. She has successfully developed a unique system for creating passive income streams. That means she is making money 24/7... without her having to do any actual work!

That's right! Sandy has created the perfect online business model that you can simply copy and put to work for yourself.

She'll explain how you can determine what products people are looking for online, how to create them and how to deliver them to your customers anytime day or night without ever having to personally see or speak to your customers.

She'll let you in on her secret strategy for getting customers to buy more from her, even though they probably had no intention of buying more products.

This is an automated business, which generates numerous automated income streams.

It's a guaranteed "blueprint" for success!

Sandy has tapped into a unique marketing technique that compels people to buy her products. She reveals the secrets of a forgotten universal law, and describes how to apply it for absolute mind-blowing success.

As I said earlier... this is not for the faint-hearted.

This is about how YOU can become seriously rich.

Bonus #1

Andrew and Darryl Brandt, a husband and wife team, set up an Internet business and made more than £125,000 in their first 12 months. Want to know how they did it? Well, you just won't believe how simple it was. Their business is **highly effective** and what's more... it's **recession proof!**

Is this something you could do? Oh yes! You better believe it...

You can forget about working for some set hourly rate, because this truly is a business that only takes about an hour of your time each day to run.

I know, I know... it's that one hour a day thing again... but that's exactly all it takes to run this kind of business. Imagine what you could do with all your free time... just live and enjoy your life!!!

Andrew and Darryl set up their business based on the 80/20 principle. That is... 20% of your effort will get you 80% of the result... and the products?

Information!

Yes, again it's information products that produces the vast amounts of wealth that you deserve. And yes, Andrew and Darryl will explain exactly how they set up their business and how you can simply copy them

for exactly the same results.

Their easy to follow presentation is suitable for both absolute newbies and also for people with some experience of Internet marketing. Even the professionals could learn a thing or two from this dynamic duo.

Their step by step guide includes how to find your market before you create or find your products to sell, how to easily check out the competition, how to test the market for profitability and to know your marketing costs long before you even spend a single penny on advertising.

This is a successful mathematical equation that has all been worked out for you in advance. All that's left for you to do is... set it up and forget it. Well, apart from that one hour a day that is.

This quality DVD recording, valued at £67, is yours completely free when you order **"Automated Income Streams"**
