

Everyone deserves to know about this...

"The Truth About How To Become A Millionaire Within 2 Years Or Less... And It's Not What You Might Think!"

Dear Friend,

You're just about to discover the quickest and only guaranteed way to becoming **very, very rich**. Now, I mean millionaire rich or even multi-millionaire rich... and just within two years or less.

Be prepared for the unexpected!

If you only knew how easy it really is you would have got started years ago. Well, at least that's what you'll be thinking to yourself... very soon.

I don't need to tell you what it would be like to have millions in the bank because you've probably thought about it many times already.

You must have at least once read about the big lottery winners and wished it was you... right?

Well it's okay to dream...

...about the big house with the swimming pool and acres of landscaped gardens...

...about the luxury cars... the exotic holidays... and just enjoying life for a change...

... instead of worrying about how you're going to pay all those mounting bills

We have all done it. But some people have gone that one step further than just dreaming about it. They have actually made it a reality. And so can you.

Find out how you can start today!

Today it's actually easier to make millions than ever before, and because of the state of the economy, there's never been a better time to get moving on this opportunity and make it happen.

You see, with recession brings opportunity. It always has... and that's because in down times there's a need for change.

There's also the need for distraction.

When things are not going very well people will seek out ways to have fun... ways to ease the pain... ways to forget about all the bad stuff going on all around them.

And that need... opens up BIG opportunities for the entrepreneur.

Opportunities that can make... many millions in profits. Some people are making millions right now from the recession so why not you?

Okay, wait a minute!

Think you might have heard all this before?

Sounds a bit "pie-in-the-sky" right?

Wrong!

This is real opportunity knocking but you have to take this seriously otherwise you could miss out BIG time!

Let's just take a quick look at what makes millionaires...

Some facts about millionaires...

There are more than **240,000 millionaires** in the UK right now and more people are joining the rich list every single week.

But just a few years ago, before the credit crunch, there were almost **490,000 millionaires** in the UK. For many, their fortunes were based on property values and we all know what has happened to the property market... don't we?

Fact... property values can go down as well as up, so although property appears to be a good investment it's just as risky as playing the stockmarket.

Investing in property is a gamble and if you don't get out when the time is right you could simply lose everything... as many have already realised.

For many people becoming a millionaire means winning the lottery. But sadly it's just a dream that has little chance of coming true.

Every week without fail millions of people hand over their hard-earned money for lottery tickets, and secretly hope and pray that their numbers will come up.

And yes! Someone will win the big prize... and yes it could be you... but the odds of becoming an instant millionaire by winning the lottery are an incredible 1 in 14 million.

Well, I'm not a gambler but that seems like pretty poor odds to me.

Fact... there's more chances of NOT winning the lottery than there are of actually winning it. So, although there's no harm in hoping, you just can't depend on a big win coming your way any day soon.

So how else can you become rich?? What can we do to be certain of making a lot of money quickly and even becoming a millionaire?

Well, there can only be one legal way that offers the odds we need to be sure of success, and that's a **business**.

Now... before you think Oh No! I don't know anything about business, and it all sounds too complicated... let me explain...

An Internet business can easily generate massive profits...

You owe it to yourself to find out more... don't you?

First off, a business doesn't mean that you have to rent an office or warehouse, employ staff, attend meetings with customers and suppliers or even speak to anyone.

This is the age of the Internet so you don't need to do any of those things. All you need is a computer with Internet access, a telephone, perhaps a printer and a product to sell. And you have most of these already.

So when I say business, I mean an **Internet business...**

Anyone can set up an Internet business that can easily be run from home. You could do it today. It can be set up within a few hours... and here's exactly what you need to get started...

A computer. It can be a desktop computer or a laptop computer. Just as long as it is in full working order and has an Internet connection, it will become your portal to a whole worldwide market place.

A telephone. It can be a landline or a mobile phone. These days people don't mind calling a mobile number because everyone is on the move. And just about everyone has a mobile phone. You might not even need a phone but it is generally expected in business.

A printer. The only reason why you might need a printer is to print off invoices for goods that you have paid for... just for your records.

A product. To start a business you will need to have something to sell. But that's the real easy part because if you don't have your own product, you can sell someone else's... **for a big fat commission.**

The only other thing you need is the "know how" and you're going to find out exactly what you need to know in just a moment...

How some Internet marketers make at least £15,000... a week!

Signing up to sell other people's products is completely free so this is an obvious place to start.

You don't need your own product and you don't even need a website to make money online. Just look at how quickly the numbers stack up... Let's say you sign up to promote 10 products.

And each product has an average commission payout of 60%. (Generally, they can have anything between 40% and 80%.)

Now if each product sells for an average £37.00 each and you get 60% commission then you'll make £22.20 on every sale.

How many will you need to sell to make any real money?

Well, if you sold just one of each product a day...

$10 \times £22.20 = £222.00$ a day. That's £1,554.00 a week.

Remember! The Internet offers you access to a worldwide market consisting of millions of buyers, so just 10 sales a day is really nothing.

More realistically, Internet marketers would expect to sell on average 50 to 100 products a day. Can you imagine... 100 sales a day...

$100 \times £22.20 = £2,220.00$ a day. And that's £15,540 a week or £62,160 a month, which is £745,920 a year.

And that's all from one income stream!

And I haven't even mentioned all the other free ways to make money.

If you made almost £750,000 in a year, you would be well on your way to becoming a millionaire the year after. And guess what?

With just a million pounds in the bank you would make **£20,000 in interest...** at a rate of just 2%. Some people have to work a whole year to earn that amount of money and you could get £20K for doing absolutely nothing!

Is it any wonder Internet marketers make so much money? The Internet has the potential to create more new millionaires much faster than winning any national lottery!

Don't just dream about it... make it happen!

You can get started in your spare time...

It's happening to people right now. People just like you... people who dared to give it a go. People who have had enough of living week to week... never knowing whether their jobs are safe and what the heck they would do should the worse thing happen.

Making millions is a dream for many people and it will always remain a dream for those who don't make any effort to change their lives.

An Internet business can give you a real opportunity to make a BIG change to your life. **And it can all be started for free.** Everything you need to get going and make money is there just waiting for you.

If you are willing to make a little effort in starting your very own Internet business, you could be taking the first positive steps to becoming a millionaire. Let's face it... it's just not going to happen any other way.

Remember! You can just start part-time and before you know it you'll have created an almost unstoppable cash generating machine working for you automatically, 24 hours a day.

You could be making money while you're watching TV, while you're on holiday and even while you're sleeping.

That's the beauty of an Internet business. Once it's all set up properly it works automatically. It becomes an auto-pilot business and will require even less time working on it.

Think about it... you can make more money than you ever imagined working just a few hours a week. I know it sounds incredible but it is happening right now.

And it's happening for people just like you. People who started out with nothing more than an ambition to make money online. Isn't that what you want to do?

Okay, there's something else... it's not a catch... it's just something that can help you achieve a massive income... very fast.

It's ***"The Secret Millionaire System"***

Yes, there are secrets to making tons of cash on the Internet but they're only secrets because you don't yet know about them.

Well, in just a moment I'm going to tell you all about them... but first...

Let's get one thing straight right here and now.

If any product, which could be either an ebook or video, doesn't show you HOW to set up a business, HOW to market that business and HOW to make profits... **then it's a fake.**

And if the author or creator of that product has no credibility by way of proof, testimonials or even just a good reputation as a marketer... **then they are phoney.**

No experience? Don't worry... just take the shortcut

Okay... back to "**The Secret Millionaire System**"

What is it and why do you need it?

Well, there's one thing that could hold you back from starting your own Internet business and it's the same thing that could mean the difference between your success and failure.

Experience!

If you have absolutely no experience about websites, blogs, online business, products, online selling, payment processors and everything else involved in making money online, then it's fair to say you could struggle a little.

Without previous experience it could take you a long time to figure out exactly what you need to do, how it should be done and the best way to do it.

And when it comes to finding out about all this stuff... all by yourself... **then experience doesn't come cheap.**

Many people have spent, or I should say wasted, many hundreds of pounds on useless information products, thinking they held the key to making money. Okay, it's true that some info products can be useful, like guides and tutorials but...

It's that learning curve...

You have to be really motivated to learn through reading books and trying things out for yourself. And that's the problem...

It might all seem too daunting and you just might be tempted to give up.

Well that's exactly why "**The Secret Millionaire System**" was created.

It's all very well for me to tell you that you can make millions on the Internet from your own business... you probably already know that anyway.

So what you really need is someone to **show you how to do it**... right?

If you were **shown** how to get a business started, **shown** how to make a lot of money, and **shown** how to create a number of successful businesses, so you could choose the ones that best suited you... you would have more chance of succeeding.

It makes a lot of sense... don't you think?

Now when I say you need to be **shown** how it all works, so that you can simply copy the system... what I mean is... you need to be shown by a real expert.

Someone who has already made millions from the Internet...

Someone who is already well-known and respected on the Internet...

Someone who other marketers go to when they want to learn about how to make money online.

Well, that someone is no other than the legendary Internet marketing guru... **Armand Morin**.

Meet the experts...

Armand has been raking in millions from his Internet business empire for years, so you probably know about him already. He's the guy who has trained and mentored all the other successful Internet marketers you hear about.

His businesses have accounted for more than **\$50 million in online sales**, and that's not all...

Get this... he runs his business from home!

That's absolutely true! He has an office in his home and he conducts all his business from there.

He is the supreme Internet marketer. A true marketing genius. And even if you could afford his \$5,000 an hour consulting fees, you would

not be able to book a session with him... because he has now given up personal coaching and mentoring.

All he does now is speak at selected seminars... to audiences of thousands of people... just like you. People who want to know HOW to make money from the Internet.

Armand has been making money on the Internet since 1996, so he should certainly know a thing or two about what really works and what doesn't... which is great news for you because...

...his very latest demonstration of his multi-millionaire profit systems have been captured on video... **just for you.**

Armand's business is capable of generating more than **\$15,000 in profits in a day!** That's right... in a single day!

This video is part of "***The Secret Millionaire System***", which is a high quality video recording of this amazing multi-millionaire and his success story.

And in just a minute you're going to know how you can personally get to see and hear him speaking at the Brighton Centre.

If you seriously want to know how to make money online, you just cannot afford to miss watching Armand Morin as he explains his own meteoric rise to success.

This is the zero to hero story that really whets the appetite. He makes it all so sound so easy and that's because... it is!

Now you can find out for yourself how he has become so seriously rich. Armand will share with you his secrets and most importantly his experience.

No more secrets...

Do you know what the 3 essential elements for business success are? You soon will because Armand is going to tell you.

Do you know exactly what the 4 stages of business success are? Armand will tell you all about this too.

Do you know how to create a residual income stream? You will and that information alone will have you all fired up and ready to go.

A residual income is when you create something just once and it keeps making money for years to come. It's like royalties from sales of a book or a record. Armand will tell you more about this.

Unlike any other Internet marketer around, Armand discloses his own advanced marketing strategies. These are the closely guarded secrets of other mainstream marketers and you'll be "blown away" by some of these amazing revelations.

And you'll even find out how to make money online without a website and without a product! **Just like I explained earlier.**

Armand also explains how to make recurring incomes from membership websites... Phew! You've just got to see this!

Do you know about the 7 steps to creating a recurring income?

Armand does and he wants to share his invaluable knowledge with you.

You'll want to watch this truly unique video recording over and over, especially as he reveals how he makes \$4 million a year from doing... **NOTHING!**

Do you think Armand could be bothered to spend hours and hours writing ebooks and developing software products for his business?

Nope... absolutely no way! He just gets other people to do all the work for him and so can you. You can hire people to do just about anything online... as you'll find out.

If you had to pay Armand for his time as he revealed all this insider information to you on a one-to-one... it would cost you at least \$5,000.

That was the consulting fee he was charging, but now he doesn't do private consultations, so this is the only way you'll ever get to see and hear him.

For anyone starting out in business and for anyone already in business but not yet making at least £30,000 a month... you just cannot ignore this guy.

Simply put... if you really want to know how to make millions then watch Armand Morin as he fully explains how it's done.

Now, if that's not enough to get you excited then I've got something else...

"The Secret Millionaire System" is more than just a training video featuring the most successful Internet marketer in history, it's a workshop. I know that some people may not be quite ready for some of the stuff Armand will show you, so there's more...

Buy it! Sell it! Love it!

Here's an alternative way to making a lot of money online and something a lot of people will already know about... it's ebay.

Now before you think to yourself... Oh No! Not ebay!

Let me tell you more about this...

This video features **Matt and Amanda Clarkson**. You might have heard of them both or you just might have heard about Amanda.

She's known as the ebay queen, and for a very good reason...

Just a few years ago Matt And Amanda Clarkson were absolutely flat broke. He was a jobbing carpenter and she sold pies from a rusty old white van.

In total she has had 33 jobs, and so desperate to make some real money she set up 10 different businesses before she realised she had a passion for ebay.

Today this couple have made millions... on ebay.

They still do make thousands of pounds every month and in this unique training video they share all their best money-making secrets.

Getting started on ebay is probably the easiest of all Internet businesses because you don't need a website, you don't have to advertise, you don't need to know about anything too technical, your customers come to you and they pay you up front.

What could be better than that?

Matt and Amanda have found ways to almost completely automate their ebay business, which leaves plenty of time for shopping and holidays and generally enjoying the good things in life.

If you have already tried selling on ebay then there are many tips and tricks revealed in this quality video that will boost your profits to levels you never thought possible.

And if you've never tried ebay... then you're in for a real treat.

I'm not kidding when I say that this has got to be the easiest Internet business to run and the profit potential is staggering.
