

Discover The Truth About Hair Loss And The Only Effective Natural Hair Restoration Remedy Available

"They said that reversing the process of hair loss
couldn't be done... but I proved them all wrong"

Worried About Your Hair Loss? Need to quickly find a way to restore your hair growth?

You're not the only one! But there's no need to worry about hair loss any longer...

Hi, I'm Paul Taylor...

And I suffered male pattern baldness (androgenetic alopecia) for **seven long years**.

At first I noticed my hair was receding at the temples, and then the crown, and then it began to get thinner at the back. I began to panic! Not least because I always associated hair loss with old age... **but I was only 23 years old!**

All that was before I **discovered a secret** about the causes of hair loss, which enabled me to stop and reverse the hair loss process completely. Now you're going to find out how you can do the same...

Quite simply, what I discovered has changed my life and I absolutely guarantee it could change yours too. And here's how...

In the west more than 25% of men begin to show visible signs of hair loss by the time they reach the age of 30. Around 65% begin balding by the time they reach 60. It's cold comfort to know that you are not alone... but that's absolutely no help to you at all if you want to try and keep your hair. Or is it?

Well, if it wasn't for so many men, and a few women losing their hair, then this incredible natural cure might never have been discovered. More about that in just a moment...

First, if you've tried every hair restoring product on the market and found that nothing really works, it's time to try the only real and natural alternative.

Stop getting ripped off...

Hair loss, especially in males, has spurred numerous pharmaceutical companies, and others, to produce all manner of hair and scalp potions, lotions and pills, which promise to help reduce hair loss, and many even claim hair loss prevention and complete hair re-growth.

But as you know perfectly well, these "amazingly wonderful" hair treatments either do not work at all or at best only slow down the problem of hair loss.

I don't know which is worse. Going completely bald over the course of a few months or agonising over receding hair lines and thinning hair for years.

So if hair loss is affecting you and the inevitable is a certainty... what can you do?

Use more hair loss and hair loss prevention treatments? No!

Mortgage your home and risk having a costly hair transplant? No!

**Do you really want to resort to using organin, the spray-on hair remedy?
No way!**

Do you want to wear a wig for the rest of your life? No of course not!

No one wants to be a laughing stock and there's nothing at all funny about losing your hair. Believe me I know first hand.

So, if you've just realised that you're getting a little thin on top or your hair is receding at the temples, then you've found this website just in time.

And if you're someone who has already tried taking the hair loss remedy route and you didn't find a hair loss solution there, then I have something that is going to be of real interest to you too.

At last!
The truth about hair loss can now be revealed...

Pattern baldness might be quite common but it doesn't mean you have to grin and bear it. Now even alopecia sufferers have a chance to restore their hair.

Of course, losing hair is a natural process. Everyone sheds between 50 and 100 hairs a day. The problem is for some people... **they just don't grow back.**

Well, the good news is you can now stop worrying about hair loss and start enjoying your life again. Stressing and worrying about thinning hair is pointless and I should know...

I was thinning at the temples myself and yes I was continually worrying about it. I was worried because I never dreamt I would ever go bald, and truth is I simply didn't want to. I'm not the kind of guy who would look good with a bald or shaven head.

Balding men always look much older than they are and for many people, like me, this change in appearance was hard to take lightly. Secretly, many men battle to come to terms with hair loss but almost none will ever admit that the problem causes them anxiety.

In typical male fashion they just shrug off the taunts and pretend that they are not really bothered, whilst deep down inside they long to have a full head of healthy hair again.

Well, that was me. I tried to pretend that losing my hair didn't matter and I tried desperately not to let my true inner feelings show. But behind closed doors and in the privacy of my bathroom I began, in desperation, to use the very same hair loss treatments that many others have tried... and the results were less than impressive.

Now, although I was feeling a little depressed I'm not one for giving up so I decided to make it my mission in life to find a real cure for baldness. First I researched every aspect of hair loss.

And I mean I really researched!

I spent hours a day researching. I researched every possible medical condition that causes hair loss right through to every probable natural hormone imbalance imaginable.

I researched all manner of shampoos and conditioners. I researched hair loss treatments like Minoxidil and Rogaine, Roxithromycin and Nizoral to mention a few. I researched caps and Indian head massage and even hypnosis.

But it wasn't until I started researching the medical and physical possibilities that I stumbled on what I believed to be the answer. And it had absolutely nothing at all to do with all the things that everyone thinks are the causes of hair loss.

But to be absolutely sure, I needed proof that my theory would work. I needed a guinea pig... so I put myself up as candidate and set about working on a possible "cure".

Finally! The natural hair loss "cure" is discovered

I would never have believed that a simple and completely natural remedy could cure my hair loss, and I expect you might find it hard to believe too. That's why I fully guarantee that this unique hair restoration treatment really does work.

Here's what I found during my intense research...

The real reason for genetic hair loss is... skull expansion!

It's absolutely true! Skull expansion is the primary cause of genetic hair loss, which means all the so-called experts have been on the wrong track for years. Is it any wonder nobody ever found a cure?

My research uncovered some startling facts about skull expansion. I found that this bone growth directly hinders the normal scalp circulation, which is vital for strong hair growth. This process then progressively causes genetic alopecia, hair loss and thinning hair in both **men and women**.

Now that the actual cause of hair loss had been truly identified I then set about finding a way to reverse the whole process.

And the result?

The "Top Hair Loss Remedy" was born.

Having spent a few months perfecting my remedy and using myself as a guinea pig, the results were astounding. My hair began to thicken and re-grow in all the areas that I was previously losing it fast. **I had done it!**

I had found the absolute "cure" for one of the most irritating and worrying problems known to man. And the best part is... **it's all completely natural**. No chemicals, no pills and no potions whatsoever.

For me, hair loss is now a thing of the past and I can't tell you how overjoyed and relieved I really am. My whole life has been uplifted to a permanently happier level. **And the good news is so will yours...**

You can find out how skull expansion causes hair loss and how the hair loss industry got it very wrong by reading: "**Skull Expansion – True Cause of Genetic Hair Loss.**"

This ebook is completely **FREE** and contains vital information for anyone with genetic hair loss (male and female pattern baldness).

It reveals...

- ✓ **Compelling evidence** for skull expansion - the **true** cause of genetic hair loss!
- ✓ How skull expansion can affect both **men and women.**
- ✓ The one type of **exercise** that can **seriously hinder hair growth!**
- ✓ Why **sebum** (greasy hair) has been linked to hair loss.

This Added Bonus is valued at **\$20** but you get it completely **Free!**

Here's what others say about the Top Hair Loss Remedy

"I am extremely happy to say that **my hair has actually started to thicken up at the back of my head.** Amazing! All the supplements I have taken over the years have never given me any results such as this."

"...Thank you for all your helpful advices. The results I have gotten from your remedy so far has proven to be very good and has made me very optimistic. Again, thank you!"

Mr E. Bamber

"Just try these exercises for a couple of months and let the results speak for themselves because **they really do work,** and I have never experienced so much regrowth with any supplement that I have taken."

"I would also like to thank you personally for putting this information out to people. **You have truly discovered the true cure** for hair loss and I am extremely thankful for all the help you have given me."

Mr B. Woods

"I am very happy to say that **my hair has got a lot thicker these last few weeks.** Thank you!"

Mr E. Chan

"Thanks Paul. I've been concentrating on your techniques from the ebook. **I notice an amazing result every time.** My hair gets very energized".

Mrs L. Rheinart
